Cu siguranta ne intrebam cu ce porumbei reuseste acest lucru. Huub are la baza linia Van Loon porumbei care pot zbura de top distante cuprinse intre 100 si 700km. In anii 2007 si 2008 a introdus la matca porumbei din cele mai bune linii cum ar fi Pieter Veenstra (3 frati

si un semifrate cu Mr. Blue,un fiu si o fiica din Prima Donna si 3 fii din Mr. Blue) apoi Van Dick(7 nepoti din Kannibaal) si nu in ultimul rand 7 nepoti din celebrul zburator si reproducator "De Kleine Dirk" Gerard Koopman.

Rezultatele acestor imperecheri au fost niste porumbei care s-au remarcat an de an in provincia Limburg (2400 crescatori)locul unde zboara Huub.Este de remarcat ca Huub reuseste aceste rezultate fara a avea foarte mult timp liber din cauza serviciului la primaria din Leudal.Fara ajutorul sotiei si al mamei sale nu ar fi reusit sa devina un crescator de success.

Pentru zborurile de general Huub are o echipa formata din 21 de masculi vaduvi si 24 femele vaduve,iar pentru cele de maratn isi pregateste o echipa formata din aproximativ 20 de masculi.La matca detine in acest moment in jur de 30 de cupluri care sunt imperecheate in luna decembrie.Zburatorii pentru categoria general sunt imperecheati in luna ianuarie.La varsta de 14-16 zile ale puilor porumbeii sunt separati crescand atat masculul cat si femela cate un pui pentru a face relatia mult mai puternica.Porumbeii vor fi imperecheati inainte de primul zbor si dupa ce vor oua si vor cloci 8 zile vor fi separate din nou...si acum va incepe vaduvia.
